[summary]: China Export-Import Bank invests in Uzbek potash fertilizer plant project [Russia News Network] On September 22, a senior representative of Uzbekistan's "Uzbek Chemical Industry" company revealed that China Export-Import Bank and Uzbekistan Industrial Construction Bank signed a $110.5 million loan agreement on the 21st for the implementation of the second phase of the Dekhkanabad potash fertilizer plant project in Kashkadariya Province in southern Uzbekistan. The second phase of the Dekhkanabad potash fertilizer plant project aims to triple the plant's production capacity to 600,000 tons per year, of which about 350,000 tons will be used for export, with a construction period of 4 years.

Newlyweds in Turkmenistan can enjoy low-interest loans for home purchases [Xinhuanet] Turkmen President Gurbanguly Berdimuhamedov recently signed a presidential decree requiring relevant agencies to effectively protect the rights of newlyweds to purchase homes, furniture, appliances and production tools with low-interest loans. According to this presidential decree, newlyweds in the country can apply for consumer loans of up to 6,000 manats (1 US dollar equals 2.85 manats), with a repayment period of up to 3 years and an annual interest rate of 1%. In addition, newlyweds can also apply for a 30-year low-interest home purchase loan, with an annual interest rate of 1%, and a preferential repayment period of 5 years.

On October 8, the author learned from Xinjiang Oilfield Company that, as of now, natural gas has been developed in the eastern block of the Junggar Basin, and four exploration wells have been drilled. In the middle of last month, the drilling ceremony for the natural gas project in the Dajing block of the Junggar Basin, a cooperation between China National Petroleum Corporation and Australia's Dato Energy, was held in the eastern basin of the Junggar Basin. After more than a month, the first batch of four wells were successfully drilled. Xinjiang Oilfield Company stated on the 8th that the cooperation with Australia's Dato Energy to explore and develop coalbed methane resources in the Dajing area of the Junggar Basin is the first exploration of Xinjiang Oilfield Company in the field of unconventional natural gas. Dato Energy has rich experience in the exploration of unconventional oil and gas resources.

"The first China-Eurasia Expo was held in Urumqi, which will further promote regional economic cooperation and trade exchanges in the SCO. I am very pleased to see that China's Xinjiang is becoming a 'frontline' for economic cooperation with other economies under the fr amework of the Shanghai Cooperation Organization." On the morning of August 31, the Secretary-General of the Shanghai Cooperation Organization, Imanaliev, said something that inspired the people present. Mr. Imanaliev started with the "Shanghai Cooperation Organiz ation Regional Economic Cooperation Forum" of the Asia-Europe Expo. An important topic at this forum was trade.

China and Russia accelerate transformation and upgrading of economic and trade cooperation

Document Delivery

[Theme words] Transformation and upgrading | Sino-Russian economic and trade cooperation | Russia | …

From October 11 to 12, Russian Prime Minister Vladimir Putin led a large trade delegation to visit China, which attracted wide attention a nd positive comments from the local media in Moscow. In 2010, China surpassed Germany to become Russia's largest trading partner, with bilateral trade exceeding US$55 billion. Prime Minister Vladimir Putin's visit has once again focused the attention of all sectors on Si no-Russian economic and trade cooperation. The leaders of China and Russia not only clarified the development goals of Sino-Russian economic and trade relations in the next 10 years, but the relevant cooperation intentions also showed that the two countries have accel erated the pace of transformation and upgrading of economic and trade cooperation.

The first China-Eurasia Expo is where the world's attention is focused

According to information provided by the National Energy Administration of China, the China-Turkmenistan Natural Gas Pipeline has sup plied 14 billion cubic meters of natural gas to China, meeting China's rapidly growing market demand. The China-Turkmenistan Natural Gas Pipeline is part of the Central Asia Natural Gas Pipeline. The Central Asia Natural Gas Pipeline, which supplies gas to China, starts from the border between Turkmenistan and Uzbekistan on the right bank of the Amu Darya River, passes through central Uzbekistan an d southern Kazakhstan, and then connects with China's "West-East Gas Pipeline II". The Central Asia-China Natural Gas Pipeline, with a total length of more than 10,000 kilometers, has an annual transmission capacity of 30 billion cubic meters. 13 billion cubic meters of t his comes from CNPC's Amu Darya Right Bank Natural Gas Project in Turkmenistan.
